Research Profile

Computer Science & Engineering graduate with research interests in Computer Vision, Human Computer Interaction, and Assistive Technology. Interested in developing intelligent and human-centered systems for real world applications. Seeking opportunities in university teaching, academic research, research collaboration, and higher studies.

Research Interests

Computer Vision • Human Computer Interaction • Deep Learning • Assistive Technology

Education

2022–2026 **B.Sc. in Computer Science & Engineering**
United International University, Dhaka, Bangladesh
CGPA: 3.94/4.00 **Relevant Coursework:** Data Structures & Algorithms, Database Management Systems, Software Engineering, Computer Networks, Artificial Intelligence, Data Mining, Machine Learning, Digital Image Processing.

Research Work

2025–2026 **Understanding Deepfake Perceptions and Detection Practices among Vulnerable Social Media Users in Bangladesh**
Undergraduate Thesis

- Investigated how social media users perceive, understand, and respond to deepfake content.
- Conducted quantitative survey research and qualitative interviews to examine user experiences with synthetic media.
- Explored the problem from Computer Vision, Human–Computer Interaction, and Social Computing perspectives.

2025–Present **SIDAS: A Spatial-Intent-Decision Adaptive System for Assistive Indoor Navigation**
Personal Research Project

- Developing the concept of a Spatial–Intent–Decision Adaptive System (SIDAS) for AI-assisted navigation.
- Exploring computer vision, depth estimation, spatial reasoning, decision-making, and multimodal feedback for assistive systems.

Publications & Manuscripts

- Nahin Intesher**, et al. *Understanding Deepfake Perceptions and Detection Practices among Vulnerable Social Media Users in Bangladesh*. Undergraduate Thesis, 2026.
- Nahin Intesher**, et al. *Spatial–Intent–Decision Adaptive System (SIDAS): An AI-Based Assistive Navigation Framework*. Manuscript in preparation.

Teaching Experience

2024–Present **Undergraduate Teaching Assistant** Dhaka, Bangladesh
United International University

- Guided academic problems and technical concepts of many student with practical exercises.

2024–Present **Owner & Academic Instructor** Dhaka, Bangladesh
Diganta Coaching Center

- Helps students of class 6 to 10 to understand any topic easily and encourage them in various sectors where they can contribute.

Selected Projects

06/2025–present	Deepfake Detection System <i>ViT + LSTM</i> - Developed a video deepfake detection system combining a Vision Transformer backbone with LSTM-based temporal modeling. Technologies: Python, PyTorch, OpenCV, Hugging Face Transformers.
04/2025–06/2025	Jiggasha <i>Gamified Educational Platform</i> - Developed an online educational platform incorporating gamification to make learning more interactive and engaging. Technologies: Next.js, Node.js, PostgreSQL.
06/2024–08/2024	Discover You <i>Talent Discovery & Development Platform</i> - Developed a platform that enables users to discover and develop their talents through an interactive web experience. Technologies: React, Node.js, MySQL.
05/2025–Present	Diganta Coaching Center <i>Website of a Coaching Center</i> - Diganta is my Coaching Center. Made a website for my coaching for the smooth interaction between students and teachers. Technologies: Next.js.

Technical Skills

Programming	Python, C, C++, JavaScript, TypeScript
AI / Machine Learning	PyTorch, OpenCV, Hugging Face, Deep Learning
Web Development	Next.js, React, Node.js, Express.js, React Native
Database	PostgreSQL, MySQL
Tools	Git, GitHub, Linux, Adobe Illustrator

Academic Activities

- Undergraduate Teaching Assistant at United International University.
- Undergraduate research and thesis work in HCI.
- Development of software for research and educational applications.
